

## The COVID-19 Legislative Dashboard

As the State and Federal government reopen the economy in phases, it is important for healthcare providers to stay up to date on temporary statutory and regulatory changes that went into effective during the COVID-19 crisis. Some of these important changes are **waivers, modifications, exceptions, and immunities from liability**. Below is a **Dashboard** that provides useful information on:

- The start and expiration dates of the state and federal statutory/regulatory changes;
- The source and title of the statutory/regulatory change;
- An explanation of the statutory/regulatory change.

**This Dashboard will be updated periodically to reflect ongoing changes and additional information.**

MLMIC policyholders may contact the law firm of **Fager Amsler Keller & Schoppmann, LLP** as a free value-added service at **1-855-FAKS-LAW** for current information on these statutes/regulations as well as other important COVID-19 information.

### Important Dates:

- **January 31, 2020** the Secretary of the Department of Health and Human Services, Alex M. Azar, II declared a Public Health Emergency for the entire United States to aid in response to the 2019 Novel Coronavirus. The declaration was retroactive to January 27, 2020 and will remain in effect for the duration of the crisis.
- On **March 7, 2020**, Governor Andrew Cuomo issued **Executive Order 202** (periodically updated) which declared a State Disaster Emergency for the entire state of New York. This declaration has been extended and shall remain in effect until December 3, 2020.
- In NYS it is anticipated that further extensions of these orders will be issued as this crisis continues.
